Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	<i>Describe customer with 3-4 key characteristics - who are they?</i>	A school staff member (Caller) who reports IT issues to the school IT support team, mostly by submitting a ticket with a short description of the problem.
I'm trying to	<i>List their outcome or "job" the core about - what are they trying to achieve?</i>	Report an IT issue (Wi-Fi / Network, Projector, forgot password, slow computer) and be sure the request is received and correctly routed.
but	<i>Describe what problems or barriers stand in the way - what bothers them most?</i>	The ticket may be left without a Category or Subcategory, and I get no confirmation that my request was submitted.
because	<i>Enter the "root cause" of why the problem or barrier exists - what needs to be solved?</i>	Tickets are classified manually from the Short Description, so classification is inconsistent and there is no automatic acknowledgement.
which makes me feel	<i>Describe the emotions from the customer's point of view - how does it impact them emotionally?</i>	Uncertain and frustrated about whether my issue will be handled on time.

Example:

I am	I'm trying to	But	Because	which makes me feel
a school staff member	report a projector issue	the ticket has no Category	classification is done manually	Uncertain

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A school staff member (Caller) reporting an IT issue	Report an IT issue and know it was received and routed	Category / Subcategory may be missing and I get no confirmation	Tickets are classified manually with no automatic acknowledgement	Uncertain and frustrated
PS-2	A school IT support team member handling incoming tickets	Work tickets that already have the correct Category and Subcategory	Tickets arrive unclassified or classified inconsistently	Classification depends on manual effort for each ticket	Slowed down and overloaded

Project: Auto Ticket Classification using Flow Designer (ServiceNow PDI, Flow Designer, flow Auto Classify School IT Tickets). Entries describe the project scenario; refine them with your team or user feedback if available.
