

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	[Enter Date]
Team ID	[Enter Team ID]
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Flow Trigger	Trigger: Record Created Table: Incident Workflow Condition: Category is Empty
FR-2	Ticket Classification	Wi-Fi / Network: Short Description contains Wi-Fi or Network, set Category Network and Subcategory Wi-Fi Projector: Short Description contains Projector, set Category Hardware and Subcategory Projector Password: Short Description contains Forgot password, set Category Access and Subcategory Forgot Password Slow Computer: Short Description contains Slow Computer, set Category Performance and Subcategory Slow Computer Implemented with If / Else If conditions and the Update Record action
FR-3	Email Notification	Send Email action to the Caller (Caller > Email) Subject: Your Request for the issue has been submitted.
FR-4	Flow Activation & Testing	Activate the flow Auto Classify School IT Tickets Test with sample tickets for each condition [Insert test results]

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Callers only describe the issue in the Short Description; the flow sets the Category and Subcategory, so no extra manual step is needed.
NFR-2	Security	The solution runs inside ServiceNow and relies on its platform authentication and role-based access [Confirm roles used for the Caller and administrator].
NFR-3	Reliability	Keyword conditions in Flow Designer give the same Category and Subcategory each time for the same Short Description.
NFR-4	Performance	The flow runs automatically when a record is created [Insert observed execution behaviour after testing].
NFR-5	Availability	Hosted on a ServiceNow Personal Developer Instance; availability depends on the instance staying active.
NFR-6	Scalability	More keywords, categories and subcategories can be supported by adding If / Else If conditions to the flow.
