1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the **Auto Ticket Classification using Flow Designer** project (flow: Auto Classify School IT Tickets, ServiceNow Personal Developer Instance, Global application) at the time of the release to User Acceptance Testing (UAT). Milestone 3: Automation using Flow Designer and Email Notification.

Status (draft): The flow has been created and the Record Created trigger is being configured. The If / Else If branches, Send Email action, Activate and testing are not yet done, so the tables below are blank and will be completed after UAT execution.
